

DROLL YANKEES®

The World's Best Bird Feeders®

Ring Pull Sunflower/Mixed Seed or Nyjer Seed Feeder

For easy filling, slide the metal cap evenly up the bail wire and it will fall to the side. All Droll Yankees Feeders can be disassembled for easy cleaning or replacing parts.

Cleaning: Please for the sake of the birds, keep your feeders clean! Dirty feeders can harm the birds. Use a mild soap and water solution and a soft bristle brush for thorough and simple cleaning. Dry completely before filling with seed.

Disassemble

1. Remove the top cap by sliding the cap up the bail wire and gently pull each end of the bail wire out of the bail rod.
2. Pull rod by the ring upward, which will release each pair of ports. Place each pair of ports aside together as each port will have a male and female connection. The base will release by disassembling the bottom pair of ports.
3. Squeeze the tube, slightly oblong in shape, horizontal with the bail rod, and reach inside the tube and remove the bail rod.

Assemble

1. Install the bail rod by squeezing the tube, slightly oblong in shape, horizontal with both holes which accepts the bail rod and insert bail rod into the holes on tube.
2. Place bottom of tube on base, aligning small holes in the tube and in the base. While tube is in a vertical position, place top pair of ports in their designated holes in the tube.
3. Insert pull rod into the hole in center of bail rod and slide rod through first set of ports while holding them together. Continue until all ports have been installed.
4. Replace cap by inserting each end of the bail wire into the bail rod and slide cap down into place on the tube.
