

# DROLL YANKEES®

The World's Best Bird Feeders®

## The New Generation Metal Finch Sock Feeder CJM13FSY & CJM13FSS

For easy filling, slide the metal cap evenly up the bail wire and it will fall to the side.

All Droll Yankees Feeders can be disassembled for easy cleaning or replacing parts.

**Cleaning:** Please for the sake of the birds, keep your feeders clean! Dirty feeders can harm the birds. Use a mild soap and water solution and a soft bristle brush for thorough and simple cleaning. Dry completely before filling with seed.

### Disassemble

1. Remove the metal cap by sliding the cap up the bail wire and gently pull each end of the bail wire out of the bail rod.
2. Squeeze the metal mesh tube, slightly oblong in shape, horizontal with the bail rod, and reach inside the metal mesh tube and remove the bail rod.
3. Remove the base by unscrewing the binding post screw on one side, and sliding out the binding post barrel from the opposite side.

### Assemble

1. Install the bail rod by squeezing the metal mesh tube, slightly oblong in shape, horizontal with both holes which accepts the bail rod and insert bail rod into the holes on the metal mesh tube. Squeeze metal mesh tube back into circular shape.
2. Place bottom of metal mesh tube on base, aligning small holes in the metal mesh tube and in the base.
3. Slide the binding post barrel through the hole on one side of the base, and screw the binding post screw into the binding post barrel.
4. Replace cap by inserting each end of the bail wire into the bail rod and slide cap down into place on the metal mesh tube.
