

DROLL YANKEES®

The World's Best Bird Feeders®

SUET FEEDER ENHANCEMENT!

Droll Yankees® suet feeders are now equipped with a chain handle. One end is permanently attached to the feeder and the other end has an S hook to latch onto the feeder. This provides a much sturdier hanger that can't pop out of the handle holders, not even if a squirrel jumps on top of it!

The chain can be used in three ways. In one application, it can be wrapped around a tree branch and then latched onto the feeder. The old handle eyelet does not accept the S hook; attach to a cross bar of the feeder. This method prevents the feeder from sliding on the branch. Another method is to loop it over a hook, then through the side of the feeder and back up to a point on the chain to take up the slack, slipping the S hook through a link in the chain. And third, you can now hang our double suet feeder horizontally.

We hope that you find that this improvement makes our suet feeders even better. We pride ourselves on making The World's Best Bird Feeders®.
