

The World's Best Bird Feeders

**Ultimate Pole Auger
Model # UPA**

Contents: One auger, three 16" extensions

Installation: Place the extensions on the three legs of the auger. In a flat area of your yard, hold the auger erect with the auger tip on the ground. Turn the auger by the extension legs, using them as levers to screw the auger into the ground. Be sure to keep the auger perpendicular to the ground. Turn until the extension legs are flush against the ground and the installation is stable. Insert your **Garden Pole (GP)** and tighten the thumb screw. The stability of your pole and auger will depend in part on the composition of your soil. If installed on a slope, shim the extension legs to make level.
