

DROLL YANKEES®

The World's Best Bird Feeders®

The New Generation Peanut Feeder with binding post barrel & screw

For easy filling, slide the metal cap evenly up the bail wire and it will fall to the side.

All Droll Yankees Feeders can be disassembled for easy cleaning or replacing parts.

Cleaning: Please for the sake of the birds, keep your feeders clean! Dirty feeders can harm the birds. Use a mild soap and water solution and a soft bristle brush for thorough and simple cleaning. Dry completely before filling with peanuts.

Disassemble

1. Remove the top cap by sliding the cap up the bail wire and gently pull each end of the bail wire out of the bail rod.
2. Squeeze the wire cage, slightly oblong in shape, horizontal with the bail rod, and reach inside the wire cage and remove the bail rod.
3. Remove the base by unscrewing the binding post screw on one side, and slide the binding post barrel out from the opposite side.

Assemble

1. Install the bail rod by squeezing the wire cage, slightly oblong in shape, inserting the bail rod in the 5th square from the top on each side of the wire cage. Squeeze wire cage back into circular shape.
2. Place bottom of wire cage on base, aligning squares on the wire cage with the holes in the base.
3. Slide the binding post barrel through both the square of the wire cage and the hole in the base to the opposite side. Screw the binding post screw into the binding post barrel.
4. Replace cap by inserting each end of the bail wire into the bail rod and slide cap down into place on the wire cage.
