

DROLL YANKEES®

The World's Best Bird Feeders®

The New Generation/CJ Series Sunflower/Mixed Seed Bird Feeder

For easy filling, slide the metal cap evenly up the bail wire and it will fall to the side.

All Droll Yankees Feeders can be disassembled for easy cleaning or part replacement.

Cleaning: Please for the sake of the birds, keep your feeders clean! Dirty feeders can harm the birds. Use a mild soap and water solution and a soft bristle brush for thorough and simple cleaning. Dry completely before filling with seed.

Disassemble

1. Remove the top cap by sliding the cap up the bail wire. Gently pull each end of the bail wire out of the bail rod.
2. Squeeze the tube, slightly oblong in shape, horizontal with the bail rod, and reach inside the tube and remove the bail rod.
3. Remove each pair of ports which are held together with a nut and a Phillips screw.
Note: Removal of the bottom pair of ports will release the base.

Assemble

1. Install bail rod by squeezing the tube, slightly oblong in shape, horizontal with both holes which accepts the bail rod and insert bail rod into the holes on tube.
2. Port Installation: First, place screws in screw holes on each port and set aside. Replace ports by starting at the top and working your way down. While tube is in the horizontal position, hold nut in place on port with your finger while placing port onto tube. While still holding the nut in place, take the second port w/screw and place opposite of the port w/nut and tighten the screw.
Note: Remember to place base on tube before assembling bottom pair of ports.
3. Replace cap by inserting each end of the bail wire into the bail rod and slide cap down into place on the tube.
