

## Directions for assembly: Model DCF – Dorothy's Cardinal Feeder

### Dome assembly

1. Install O-ring 1" below the curved end on the Rod.
2. Slide the rod through the top of the dome against the O-ring.
3. Insert Collar and Set Screw onto rod and tighten beneath the dome.

### Tray assembly

1. Screw the Short Rod Nut to the top of the threading on the Rod.
2. Insert the DCF Plastic Insert into the hole in the UN Tray, so that the flanges are on the bottom.
3. Place the UN Washer on the top of the UN Tray over the hole.
4. Insert the rod through the UN Washer and screw into the DCF Plastic Insert until snug.

The height of the dome is adjustable on the rod by loosening the collar and set screw and sliding the dome up or down on the rod. The dome can be lowered to within a couple inches of the tray to keep out large birds.

You can either hang or pole-mount your Dorothy's Cardinal Feeder. The DCF Plastic Insert is threaded to accept the Droll Yankees Threaded Pole Adapter (ADPT). This part comes with our Garden Pole (GP) and Flower Garden Pole (FGP) and is also available separately. Simply screw the ADPT into the threaded DCF Plastic Insert and slip the stem into the open pole for quick and easy removal of the feeder for filling or cleaning. A Suet Link (SL) can also be screwed into the threaded area to hang a suet feeder or another feeder.

**LIFETIME WARRANTY AGAINST SQUIRREL DAMAGE:** Droll Yankees will replace any defective part, free of charge, for as long as you own your Droll Yankees feeder. If your feeder is badly damaged by squirrels, to the extent that the effectiveness of the feeder is compromised, Droll Yankees will, at its option, repair, replace or send replacement parts, free of charge. This warranty does not extend to damage through improper use, improper cleaning, weather, neglect, abuse, modification, disassembly, or falls. Raccoon and bear damage is not covered.

Complete written warranty can be located at [www.drollyankees.com](http://www.drollyankees.com).

## How to Maximize Your Backyard Bird Experience

**Placement:** Birds feel vulnerable out in the open, so try to place your feeder near a bush or tree but not too close where squirrels can jump on it. If you have other feeders, placing a new one near an older one will help the birds get used to it. **These creatures of habit could take weeks to feel comfortable at a new feeder.**

**Mounting:** Hang your feeder with a hook or chain or mount it on a bird feeder pole.

**What to offer:** Consider food like seed, mealworms, suet or fruit to attract different bird species.

**When to feed:** Feeding year round is good for the birds and gives you the most enjoyment.

**Water:** Birds need a regular supply of water for both drinking and bathing.

**Cleaning:** *Please, for the sake of the birds, keep your feeders clean!* Dirty feeders can harm the birds. Use a mild soap and water solution and a soft brush for thorough and simple cleaning. Dry completely before filling with seed. Set a schedule that's easy to remember, like the first of every month.

**Discourage:** Place your feeder 4 feet from the ground and 8 feet from anything a squirrel can jump from, like trees or buildings.

**Visit [www.drolleyankees.com](http://www.drolleyankees.com) for more information on feeding wild birds. Over 150 different bird feeders & accessories, and fun videos!**

**Just Feed Birds and Make a World of Difference** It's true. Because when you feed birds, you help more baby birds survive. More birds will eat more insects, so you'll need fewer chemicals to control them. And using fewer chemicals will make the environment healthier for you, your children, your pets, our water supply... and wild birds.

*We can make a world of difference, one bird feeder at a time.*
