

Bottoms Up[®] Finch Feeder

Droll Yankees feeders can be disassembled for easy cleaning and part replacement.

Cleaning: *Please, for the sake of the birds, keep your feeders clean!* Dirty feeders can harm the birds. Use a mild soap & water solution and a soft brush for thorough, simple cleaning. Dry completely before filling with seed.

Disassemble

1. Remove the top cap by sliding the top cap halfway up the bail wire which will allow the top cap with bail wire to fall to the side. Gently pull each end of the bail wire out of the bail rod.
2. Squeeze the tube, slightly oblong in shape, horizontal with the bail rod, and reach inside the tube and remove the bail rod.
3. With the feeder in a horizontal position, push the feeder down against a perch rod on a flat surface until the perch rod has been pushed further through the opposite side of the tube, and remove.
4. Remove the base and the clear baffle by unscrewing the binding post screw and pull the binding post barrel out from the opposite side.

Assemble

1. Install the bail rod by squeezing the tube, slightly oblong in shape, horizontal with both holes which accepts the bail rod and insert the bail rod into the holes in the tube.
2. Perch Rod Installation - **Note: For easier insertion, place the perch rods in the freezer for 20-30 minutes.**
 - a. Hold a perch rod in an upright position on a flat surface. With the feeder in a horizontal position, line up the perch rod with the perch rod hole in the tube. Push the feeder down onto the perch rod, allowing the perch rod to push up through the tube.
 - b. Align the partially inserted perch rod with the exit hole and push down on the feeder until the perch rod extends equally on both sides of the tube.
3. Install the baffle on the base. Place the feeder on the base aligning the holes on both the base and the tube. Slide the binding post barrel through the hole on one side of the base, and screw the binding post screw into the binding post barrel.
4. Replace the top cap by inserting each end of the bail wire into the bail rod and slide the top cap down into place on the tube.
