

Cardinal Perch Rings – Model CPR

See what your birds prefer. While some species enjoy feeding from a straight perch, others prefer to feed head-on for better visibility. Cardinal Perch Rings (CPR) allow you to convert your straight perches to platform perches to attract a wider variety of birds. Made from super-strong polycarbonate.

Fits Droll Yankees® New Generation® sunflower / mixed seed feeders. For Ring Pull feeders try Ring Pull Perch Rings (RPPR)

**Models A-6RP and TH-3RP
are not Perch Ring compatible.*
