

HUMMERPLUS BRUSH

CLEANS HUMMINGBIRD & TUBE PORTS
EASY TO USE • HANG TO DRY

**Curved brush with soft bristles cleans
saucer shaped hummingbird feeders**

Model HUM

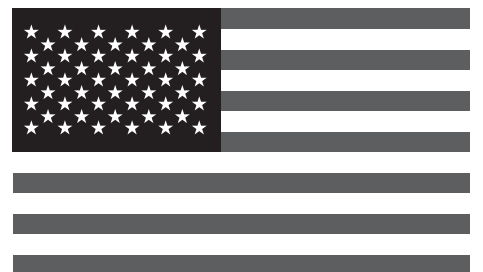

Clean your feeder every 3-5 days to prevent the growth of bacteria. Using the **HummerPlus Brush (HUM)** to clean the inside curves of your feeder, wash with hot water and a mild detergent. Use Droll Yankees' **Perfect Little Brush (PLB)** to clean nectar ports, screw threads and other tiny places. Sanitize with a 50/50 solution of white vinegar and hot water. Rinse your Droll Yankees brushes before hanging to dry.

The **HummerPlus Brush (HUM)** also effectively cleans Droll Yankees' **Big Top® Feeder (BTG)** or tubular feeder ports. To clean tubular feeders quickly and easily, try Droll Yankees' 24" **Bird Feeder Brush (BFB)**.
