

Using Suet

Many birds are attracted to suet. Suet's high caloric content means it's a high energy food and is an efficient food source. This feeder accepts standard size suet blocks. Experiment to see which flavor mix attracts the birds you want. Don't use suet when the temperature goes over 100° F. You can also use pure kidney suet found in the supermarket, but should restrict it to winter time use, as it can go rancid in all but the coldest weather. Pure suet is significantly less attractive to squirrels than mixtures containing seed or fruit.

Using Fruit

Both Orioles and Tanagers are attracted to oranges. Slice the oranges in half and leave the rind on. Remove spoiled fruit from the feeder.

Getting Started

To install the CC1 complete clamp, feed it through the back of the suet cage (with the cage door opening downward) through two sets of rungs. Place the clamp

so that it hooks directly onto the pole. Once the feeder is in the desired spot, simply tighten the screw to hold the suet feeder in place.

Chain Handle

The chain handle can be used in three ways. The chain can be wrapped around a tree limb and then attached to the feeder, looped through the feeder and hung on a hook, or the chain can be attached horizontally to the feeder directly and used in a handle-like fashion.

Troubleshooting

Initially, you may need to hang your feeder on a tree, where birds normally find food, until they recognize it as a food source. Place the cage close to the trunk to give the birds a stable place to land. Once they get accustomed to the feeder, you can move it to a better viewing location in a tree or on a pole.

LIMITED LIFETIME WARRANTY AGAINST SQUIRREL DAMAGE:

This suet feeder is covered by the Droll Yankees Limited Lifetime Warranty Against Squirrel Damage. The warranty does not extend to damage through improper use, improper cleaning, weather, neglect, abuse, modification, disassembly, or falls. Raccoon and bear damage is not covered. Feeders must be removed until the pests depart.

Please email or call with any questions or problems. We're here to help you have a wonderful bird feeding experience.

Care

Keep your feeders clean to prevent the spread of disease! Wash your suet cage periodically in a 50/50 solution of white vinegar and hot water, more frequently in warm weather.

This Droll Yankees product complies with the quality standards established by the Wild Bird Feeding Industry.
